Resolution

“USA: Hands off Venezuela!”

Under the pretext of fighting drugs, the USA is conducting military aggression against Venezuela. The real reason for this is that US corporations want access to Venezuela's raw materials, especially its oil. In addition, the growing influence of imperialist rivals Russia and China in Venezuela and other Latin American countries is reducing the profits of US corporations. They are preparing a new hot spot of war with the potential for a world war. That is why the US is promoting reactionary, fascist, and anti-communist forces in Venezuela and other countries. This reveals the true face of the fascist Trump administration, which is trying to portray itself as a dealer for peace.

However, the US government has not taken the working class and the peoples of Latin America into account. This is demonstrated by the anti-imperialist mass protests in Venezuela, with which we, the participants of the Ford Corporation Forum of the 3rd International Automotive Workers' Conference, stand in solidarity. Your struggle is part of the global anti-imperialist and anti-fascist united front. As workers, let us take full responsibility for this and form the vanguard.

We demand: Hands off Venezuela!

Withdraw all warships from the coast of Venezuela!

Stop the aggression against Venezuela!

Militant and solidarity greetings from India from the 3rd International Automotive Workers' Conference

(adopted by the participants of the Ford Corporate Forum and unanimously by the closing plenary of the 3rd International Automotive Workers' Conference on November 24, 2025)
