## Resolution

# Down with the genocide perpetrated by the State of Israel!

# Full support for the Palestinian people!

The participants of the 3rd International Automotive Workers' Conference, held from November 20 to 24, 2025, in Pune, India, are united in condemning the crimes against humanity committed by the Zionist state.

The ceasefire is a success of the global solidarity movement and the resistance of the Palestinian people. At the same time, this ceasefire is fragile and Israel is currently attacking Lebanon. We must therefore continue and expand our solidarity movement and all workers' organizations worldwide must oppose the imperialist policies of Israel and its allies, such as the governments of the US and Germany.

Activists, such as those in the flotilla, are showing us ways in which we can organize practical solidarity. Let us expand such activities of international solidarity.

(Unanimously adopted by the delegates' assembly and the closing plenary of the 3rd International Automotive Workers' Conference on November 24, 2025)
