Resolution

Condemnation of the massacre in Rio de Janeiro

Automotive industry workers gathered at their third conference express their condemnation of the recent massacre in the city of Rio de Janeiro, Brazil, which caused the deaths of 121 people. In the name of combating organized crime, the state has committed the largest massacre ever to occur in the country. Those who suffer are the poorest people, who are held hostage by violence. The state's security policy is based on the extermination of young people and black people in the suburbs. We express our disagreement with Governor Cláudio Castro, who is primarily responsible for this massacre, and we demand exemplary punishment.

Pune, India, November 24, 2025

(Unanimously approved by the closing plenary of the 3rd International Conference of Automotive Workers on November 24, 2025)
