Resolution

Unite all automotive workers to honor the 140th anniversary of May Day 2026!

Whereas automotive workers around the world are confronted with the same exploitation on the job and suppression of Democratic rights by capitalist employers concomitant with the rise of fascism in various countries around the world,

Whereas the automotive workers are engaging in various acts of resistance, including strikes and slowdowns, and even occupations, separate from one another,

Whereas the International Automotive Workers Coordination has the objective of coordinating and unifying these struggles and thereby building the strength of the International Automotive Workers movement.

Therefore, be it resolved that:

The International Automotive Workers Coordination initiate a call for automotive workers of the world to initiate or join militant commemorations of May 1st - May Day – on this, the 140th anniversary of this holiday honoring the militant traditions originating with the U.S. working class and thereby demonstrate to the world, we are prepared to defend our interests as part of a growing international working class movement.

(Unanimously adopted by the closing plenary of the 3rd International Automotive Workers' Conference on November 24, 2025)
